

Compact and flexible design
Proven low power technology
Reliable, rugged, open-loop device
Excellent performance characteristics
Low power consumption
Manifold mountable
Available in 2 and 3 wire

Technical features

Medium:

Compressed air filtered to 5 µm, oil free and dry air

Output (nominal) pressure:

0 ... 1 bar (0 ... 14,5 psi),
 0 ... 2 bar (0 ... 30 psi),
 0 ... 4 bar (0 ... 58 psi),
 0 ... 6 bar (0 ... 90 psi) and
 0 ... 8 bar (0 ... 116 psi)

Supply pressure:

At least 1,5 bar above maximum required output pressure

Supply sensitivity:

Less than 0,2 bar/3 psi for 1 bar/15 psi supply pressure change

Flow capacity:

Up to 200 N l/min (see characteristic curves)

Air consumption:

≤ 6 bar/90 psi ≤ 3 Nl/min (Typical)
 8 bar/120 psi ≤ 10 Nl/min (Typical)

Response time:

<500 ms (from 0 ... 100% or
 <150 ms (from 100 ... 0% of
 output pressure into a 10cc load)

Degree of protection:

IP20

Linearity:

< 1,5% of span

Hysteresis and deadband:

< 1% of span

Vibration & shock immunity:

<3% output shift for ± 2 g
 15-150 Hz

Fluid/Ambient temperature:

0 ... +60°C

Air supply must be dry enough to avoid ice formation at temperatures below +2°C

Temperature effect:

14 mbar max/°C change in temperature

Weight:

0,20 kg

Materials

Body: zinc casting & nylon
 Diaphragms: nitrile

Electrical details

Electrical input signal	2-pin versions: 4 to 20 mA or 1 to 10 V 3-pin versions require 12 to 34 V d.c. supply
Electrical power input	34 V d.c. ±10%
Failure mode	Output pressure falls to bleed pressure when electrical supply fails
Loop resistance	2 wire version: 250 Ω max

Option selector

VP12★★★★★0★Q00

Output pressure	Substrate
0 ... 1 bar/15 psi	01
0 ... 2 bar/30 psi	02
0 ... 4 bar/60 psi*	04
0 ... 6 bar/90 psi*	06
0 ... 8 bar/120 psi*	08
Unit for pressure	Substrate
bar	B
psi	P

Wire options	Substrate
2	0
3 (24 V d.c. supply)	1
Input signal	Substrate
0 ... 10 V	1
4 ... 20 mA	4
Port size	Substrate
G 1/8	G
NPT 1/8	H
Manifold	X

* The models with 4,6 and 8 bar pressure are only available as 3 wire.

Options to special order:

Warning

These products are intended for use in industrial compressed air systems only. Do not use these products where pressures and temperatures can exceed those listed under »Technical features«.

Before using these products with fluids other than those specified, for non-industrial applications, life-support systems, or other applications not within published specifications, consult NORGREN.

Through misuse, age, or malfunction, components used in fluid power systems can fail in various modes.

The system designer is warned to consider the failure modes of all component parts used in pneumatic systems and to provide adequate safeguards to prevent personal injury or damage to equipment in the event of such failure.

System designers must provide a warning to end users in the system instructional manual if protection against a failure mode cannot be adequately provided.

System designers and end users are cautioned to review specific warnings found in instruction sheets packed and shipped with these products.
