

Directly operated solenoid valves Series 6

2/2 - way, 3/2 - way, N.C. and N.O. Ports G1/8 and G3/8, cartridge ø 4

The bodies of these valves are designed for use either individually or in manifolds. The latter are provided with G1/8 threaded ports or an inbuilt dia. 4 cartridge (and G3/8 for 2 way).

The Series 6 solenoid valves, in the N.C. and N.O. versions, have been designed with 2/2 and 3/2 ways operations.

These solenoid valves are of the directly operated type and may be used equally well either with or without lubrication.

Construction	poppet type
Valve group	Ways / Pos. 2/2 - 3/2 N.C. or N.O.
Materials	body Al/OT58 - other stainless steel NBR seals
Mounting	in any position
Operating temperature	0 ÷ 80°C (with dry air - 20°C)
Operating pressure	see tables
Nominal flow rate	Qn (see tables)
Nominal diameter	ø (see tables)
Fluid	filtered air, without lubrication. If lubricated air is used, it is recommended to use ISOVG32 oil. The lubrication should never be interrupted.
Voltage	AC standard: 24V, 50/60Hz 110V - 50/60Hz 230V - 50/60Hz DC standard: 24V
Voltage tolerances	AC + 10% -15% DC ±10%
Power consumption	AC at inrush = 19 VA, during operation = 12 VA

class H Connector Mod. 124-800 Protection class IP65 with connector DIN 43650/PG9

G1/8 3/2-way solenoid valve Mod. 638 and Mod. 648

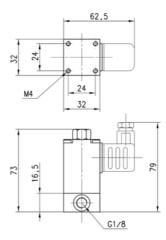

The G1/8 N.C. (closed) or N.O. (open) 3/2 - way solenoid valves are particularly suitable for operating single-acting cylinders or for use as signal valves.

3/2 -way solenoid valve Mod. 638M and Mod. 63CM

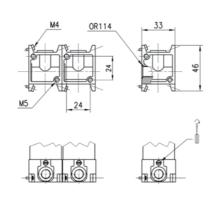

The N.C. (closed) 3/2 - way solenoid valve for manifold assembly is available with G1/8 inlet ports and with G1/8 outlets or with a dia. 4 cartridge.

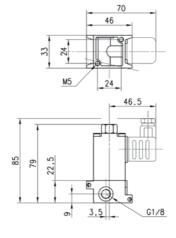

These solenoid valves are equipped with a manual override.

The body is supplied complete with screws and O-ring.
